

Exclusive Webinar for AIAHR: **How VESDA VEA Addressable Fire Solution Can Help Architects with Education Facilities in Times of Crisis**

Presented by:

La Donna Anderson

KAM for Education Honeywell/Xtralis
37 years of expertise in the fire alarm

June 23th
12:00 P.M. EST

Now is the ideal time to learn more about smoke detection technologies that can help you ensure the safety of assets and staff of your customers. Higher education and K-12 institutions are comprised of a multitude of environments, each with distinct characteristics presenting unique challenges from a fire and gas detection perspective.

In this **exclusive** webinar, LaDonna will discuss Addressable Aspiring Smoke Solutions and four points on how to maximize it use.

- ✓ How to protect educational campuses from fire, gases and smoke.
- ✓ SOCIAL Distancing practices for maintenance and testing.
- ✓ What is Aspiring Smoke Detection and how remotely protect different areas in education facilities with one detector.
- ✓ Latest cutting-edge fire technologies: RSI ,BDA , Energy Storage/battery room detection (Li-IonTamer), Gas detection (XCL).
- ✓ Main considerations in design.
